

Übung 1

Name: _____

Brüche in Dezimalzahlen umwandeln

Brüche mit den Nennern 10, 100, 1000 usw. kann man als Dezimalbruch mit Komma schreiben:

$$\frac{1}{10} = 0,1$$

$$\frac{1}{100} = 0,01$$

$$\frac{1}{1000} = 0,001$$

$$\frac{1}{10000} = 0,0001$$

Schreibe folgende Brüche als Dezimalbruch!

$\frac{9}{10} = \underline{\hspace{2cm}}$	$\frac{2}{100} = \underline{\hspace{2cm}}$	$\frac{4}{1000} = \underline{\hspace{2cm}}$
$\frac{7}{100} = \underline{\hspace{2cm}}$	$\frac{1}{10} = \underline{\hspace{2cm}}$	$\frac{7}{10000} = \underline{\hspace{2cm}}$
$\frac{9}{100} = \underline{\hspace{2cm}}$	$\frac{5}{1000} = \underline{\hspace{2cm}}$	$\frac{2}{10} = \underline{\hspace{2cm}}$
$\frac{5}{100} = \underline{\hspace{2cm}}$	$\frac{7}{1000} = \underline{\hspace{2cm}}$	$\frac{1}{100} = \underline{\hspace{2cm}}$
$\frac{6}{10} = \underline{\hspace{2cm}}$	$\frac{4}{100} = \underline{\hspace{2cm}}$	$\frac{5}{10000} = \underline{\hspace{2cm}}$
$\frac{3}{1000} = \underline{\hspace{2cm}}$	$\frac{4}{10000} = \underline{\hspace{2cm}}$	$\frac{3}{10000} = \underline{\hspace{2cm}}$
$\frac{4}{100000} = \underline{\hspace{2cm}}$	$\frac{6}{100} = \underline{\hspace{2cm}}$	$\frac{4}{10} = \underline{\hspace{2cm}}$
$\frac{8}{1000} = \underline{\hspace{2cm}}$	$\frac{8}{100} = \underline{\hspace{2cm}}$	$\frac{9}{10000} = \underline{\hspace{2cm}}$
